**Remarks by:**

Burim Hashani, Director, Energy, MFK  
Vigan Perani, Energy Specialist, MFK  
Arton Çitaku, Procurement Manager, MFK

Pilot Incentives for Energy Efficiency (PIEE) aims to provide incentives for residential consumers to invest in retrofits to reduce household energy consumption, as well as incentives aimed at increasing the involvement of women in energy sector business opportunities, and efficiency investments. The Supervising Consultant team will support the MFK in supervising the PIEE Implementing Consultant (IC). This supervising team will be responsible for conducting the initial audits of manuals, studies, and reports drafted by IC, as well as oversight of the IC's implementation of EE retrofit works to ensure that the works are completed and goods supplied in accordance with the designs, specifications and terms and conditions of the procurement contracts, including environmental, health, safety, social and gender considerations.
