PROJECTS

JUNE 2016 - JULY 2017

ELECTRIC VEHICLE IPKO BONEVET - EVIB

TEAM MEMBER, BONEVET Makerspace

Building a reliable and street-licensed electric vehicle. The build process consisted of the electric vehicle conversion of a 2007 Renault 'Twingo' from an internal combustion engine to a battery powered electric motor system. This is the first electric car converted by teenagers in the Balkans.

- Managed expenses and budget planning of our sponsored incomes and outcomes.
- Mounted mechanical parts and attaching systems in the exterior of the chassis.
- Designed customized parts for some specific areas of the vehicle

OCTOBER 2017 - JUNE 2019

ROBOT CAR WITH A TAIL

TEAM LEADER, BONEVET Makerspace

This is a bio-engineering project, which has a special focus on tail movements of a gecko. The nature of the project is educational. This project is mentored by PhD. Ardian Jusufi, one of the best bioengineers in the world. Besides this, we have been promoting green ways of doing research and giving proper solutions. You can read more, in our research featured in Advanced Robotics magazine: <https://www.tandfonline.com/doi/full/10.1080/01691864.2021.1887760>

- Prepared end of week reports
- Planned for fundraising and overall project development stages
- Designed and manufactured parts for the robot
- Evaluated the work and progress for each team member.

MAY 2018 - OCTOBER 2018

EQUAL ETHNICITIES EMPOWERMENT

Team Leader, UNMIK

E.E.E Project has had a special focus on empowering old artisans through the engagement of youngsters in their activities (interactive workshops) . Participants were from all the communities that live in this area. We reached our goal by helping the mentors with financial support and social promotion.

- Prepared the fundraising campaign
- Coordinated mentors and respective workshops
- Managed and documented the logistics of the project

VOLUNTEER ACTIVITIES

MARCH 2009 – SEPTEMBER 2018

RADIO PRESENTER, Radio Gjakova

- Presented several programmes
